The Beginning of Civilization

The first modern humans appeared in Africa and had migrated all over the world by 10,000 B.C. Because prehistoric people had no written records, historians must study them by looking at the things they left behind. Archaeologists dig up artifacts like tools, pottery, and other things made by humans. Anthropologists use artifacts and remains of ancient humans to learn about culture, or the way people lived. Historians divide early human history into major sections like the Paleolithic Age, the Neolithic Age, and the Bronze Age. Each era is defined by the progress humans made during those years.

The earliest period of human history, called the Paleolithic Age, lasted from about 2,500,000 B.C. until 8000 B.C. This era is sometimes called the Old Stone Age because early humans used simple stone tools. During the Paleolithic Age, people found shelter in caves and learned to make fire. Paleolithic people invented the spear and the bow and arrow. These early humans hunted wild animals and gathered nuts, berries, fruits, and green plants for food. Because they depended on animal migrations and vegetation cycles, almost all Paleolithic people were nomadic. This means the hunters and their families had no permanent home, but moved from place to place.

Around 8000 B.C., the Neolithic Age, or New Stone Age, started. In the Neolithic Age, humans stopped being nomadic and settled down in small farming villages. Instead of hunting and gathering, people farmed and raised animals for food. Early farmers in Africa raised wheat, barley, root crops, and bananas. People tamed cows, pigs, goats, sheep, and dogs. In Southeast Asia, farmers grew rice in addition to wheat and barley. In Central America and present-day Mexico, people raised beans, squash, and corn.

People made tools from metal in the Bronze Age. During the Bronze Age, which lasted from 3000 B.C. until about 1000 B.C., people began to form civilizations. Civilizations are complex cultures in which groups of many people share the same characteristics. The first civilizations started in the river valleys of Mesopotamia, Egypt, India, and China.

Historians know more about the Bronze Age civilizations than about earlier people. This is because people in the Bronze Age kept written records, like laws. Each civilization had cities, government, social classes, religion, writing, and art. Over time, cultures have changed, but the basic characteristics of civilization have stayed the same.
The Beginning of Civilization

Crossword Puzzle
Write the best answer in each blank, and complete the crossword puzzle.

ACROSS
2. Most ___________ people were nomadic.
5. ___________ use artifacts and remains of ancient humans to learn about culture.
6. In present-day ___________, people raised beans, squash, and corn.
7. People began to form ___________ during the Bronze Age.
9. People in the Bronze Age kept written records, like ___________.

DOWN
1. The first civilizations started in the ___________ ___________ of Mesopotamia, Egypt, India, and China.
3. The Neolithic Age is also called the ___________ ___________ ___________.
4. In the Neolithic Age, people farmed and raised animals for _____________.
5. The first modern humans appeared in _____________.
8. Paleolithic people invented the ____________ and the bow and arrow.
The Beginning of Civilization

Map – Spread of Modern Humans
Use the map to answer the following questions. Write the answers in complete sentences.

1. On which continent did modern humans first appear?

2. About how long ago did modern humans migrate to Australia?

3. About how long ago did modern humans migrate from Asia to North America?
